

Creating Dynamic Forms with
Adobe® LiveCycle®
Designer

J.P. Terry

Contents

Foreword	xi
Introduction	xiii
CHAPTER 1 The Basics	1
What is LiveCycle Designer?.....	1
A Tool for Creating Interactive and Dynamic Forms	1
Tool for Creating XFA-based Forms	4
A Multifaceted Tool	7
Getting Started	9
Installing LiveCycle Designer	9
Downloading the Samples Folder.....	10
Starting LiveCycle Designer	10
The First Screens You'll See	12
Your First Look at the Workspace	13
The Designer Workspace	13
Palettes and Objects.....	15
Designer's Flexibility for Different Users.....	16
Knowledge Workers Start with a Template	16
Graphic Designers Start with a Page	17
Data Designers Start with a Schema.....	18
Web Designers Start with an Interaction	18
Bringing It All Together	19
Creating Your First Forms	19
Method 1: Starting from a Blank Form.....	19
Method 2: Creating a Form Based on a Template	22
Method 3: Creating a Form Based on a PDF File	26
Method 4: Creating a Form Based on an XML Schema.....	28
Interactive Form Example.....	30
Dynamic Form Example	31
Moving On.....	33

CHAPTER 2	Form Design	35
	The Importance of Form Design.....	36
	The Form as a Brand Touch Point	36
	The Form as an Indicator of Service/Product Quality.....	38
	Good Form Design Saves Time and Money	39
	Improving Form Aesthetics Improves Usability	39
	Principles of Good Form Design	40
	Simplicity.....	40
	Consistency	48
	Graphic Design Tips	51
	Choosing a Font	52
	Creating a Hierarchy Through Font Style and Size.....	55
	Other Typography Tips.....	58
	Clearly Relate Captions to Actions	60
	Interaction Design Tips.....	63
	Guiding with Button Design	63
	Notifying Before Correcting	64
	Clarifying Choice with Radio Buttons and Check Boxes.....	67
	Form Guides to the Rescue.....	69
	What Form Guides Are	69
	How Form Guides Work	71
	Moving On.....	72
CHAPTER 3	Form Creation	73
	The Workspace	73
	The Layout Editor	73
	The Script Editor	75
	The Palettes.....	76
	Text Objects.....	86
	Graphic Objects	87
	Image Objects.....	88
	Field Objects.....	90
	Button Objects	102
	Check Boxes and Radio Buttons	102
	From the Simple to the Complex	103

Master and Body Pages	104
Master Pages.....	104
Body Pages	105
Examining Master Page Properties	106
Examining Body Page Properties	107
Subforms and Flow.....	108
How Subforms Work.....	109
Subforms and Data Files	113
Subforms and User Interaction	114
Tables	115
The Table Object	116
The Table Assistant and Table Menu.....	116
Dynamic Tables	117
Fonts and Tabbing.....	119
Embedding Fonts.....	119
Tips on Tabbing	121
Moving On.....	123

CHAPTER 4	Form Scripting	125
	The Benefits of Scripting	126
	FormCalc and JavaScript	129
	FormCalc	129
	JavaScript	131
	The Script Editor	132
	The Script Editor in Single-line View	132
	The Script Editor in Multiline View	133
	Basic Scripting	136
	Your First Scripts	136
	Properties	139
	Variables	142
	Referencing Objects	147
	The Form Object Model.....	152
	Understanding the Object Model	152
	Scripting the Form Object Model	155

Events	164
Examples of How Events Work	164
Types of Events	166
Script Objects	170
Creating a Script Object	170
Writing Functions in Script Objects.....	171
Referencing Functions in Script Objects	172
Debugging Scripts	173
The Warnings Tab of the Report Palette	173
The JavaScript Debugger	176
The Message Box Method.....	177
Moving On.....	178

CHAPTER 5

Form Data	179
Data Basics.....	180
Working with Data in Acrobat	180
Working with Data in Designer	182
Formatting Data	184
Submitting Data	189
Data Binding	191
Binding Form Elements	191
Types of Binding	195
Data Validation	199
Validating Data Using the Empty Message Field	200
Validating Data with Patterns	203
Validating Data with Scripting.....	206
Form Validation with Scripting	207
Barcodes.....	207
Barcode Types.....	207
Retrieving Data from Web Services	210
Connecting to a WSDL File	212
Calling the Web Service	217
Creating a Bible Verse Lookup Form	218
Moving On.....	224

CHAPTER 6	Steal These Scripts	225
	Short Scripts	226
	Message Box Scripts	226
	Mutually Exclusive Check Boxes	228
	Changing Background Colors	229
	Changing images	231
	Setting a Field as Required	232
	Working with Page Numbers	232
	Get Today's Date	233
	Medium Length Scripts	233
	Disabling All Form Fields	234
	Add Time to Date	235
	Identifying Text Fields by Partial Name	237
	Sending Email Through Scripts	238
	Calculating Totals for Repeating Objects	240
	Sorting Items in a List Box	241
	Long Scripts	243
	Highlighting Required Fields	243
	Date Validation	246
	Dynamic Entry Subform	248
	Validating User-entered Text in a Drop-down List	251
	Calling a Web Service	254
	Moving On	256
	Resources	257
	Index	259
